

HousingAffordability.viz

[Main](#) [Salary](#) [About](#)

Notes:

**Main screen shown
when users load
the page.**

**Views will change as
users type in a zip code**

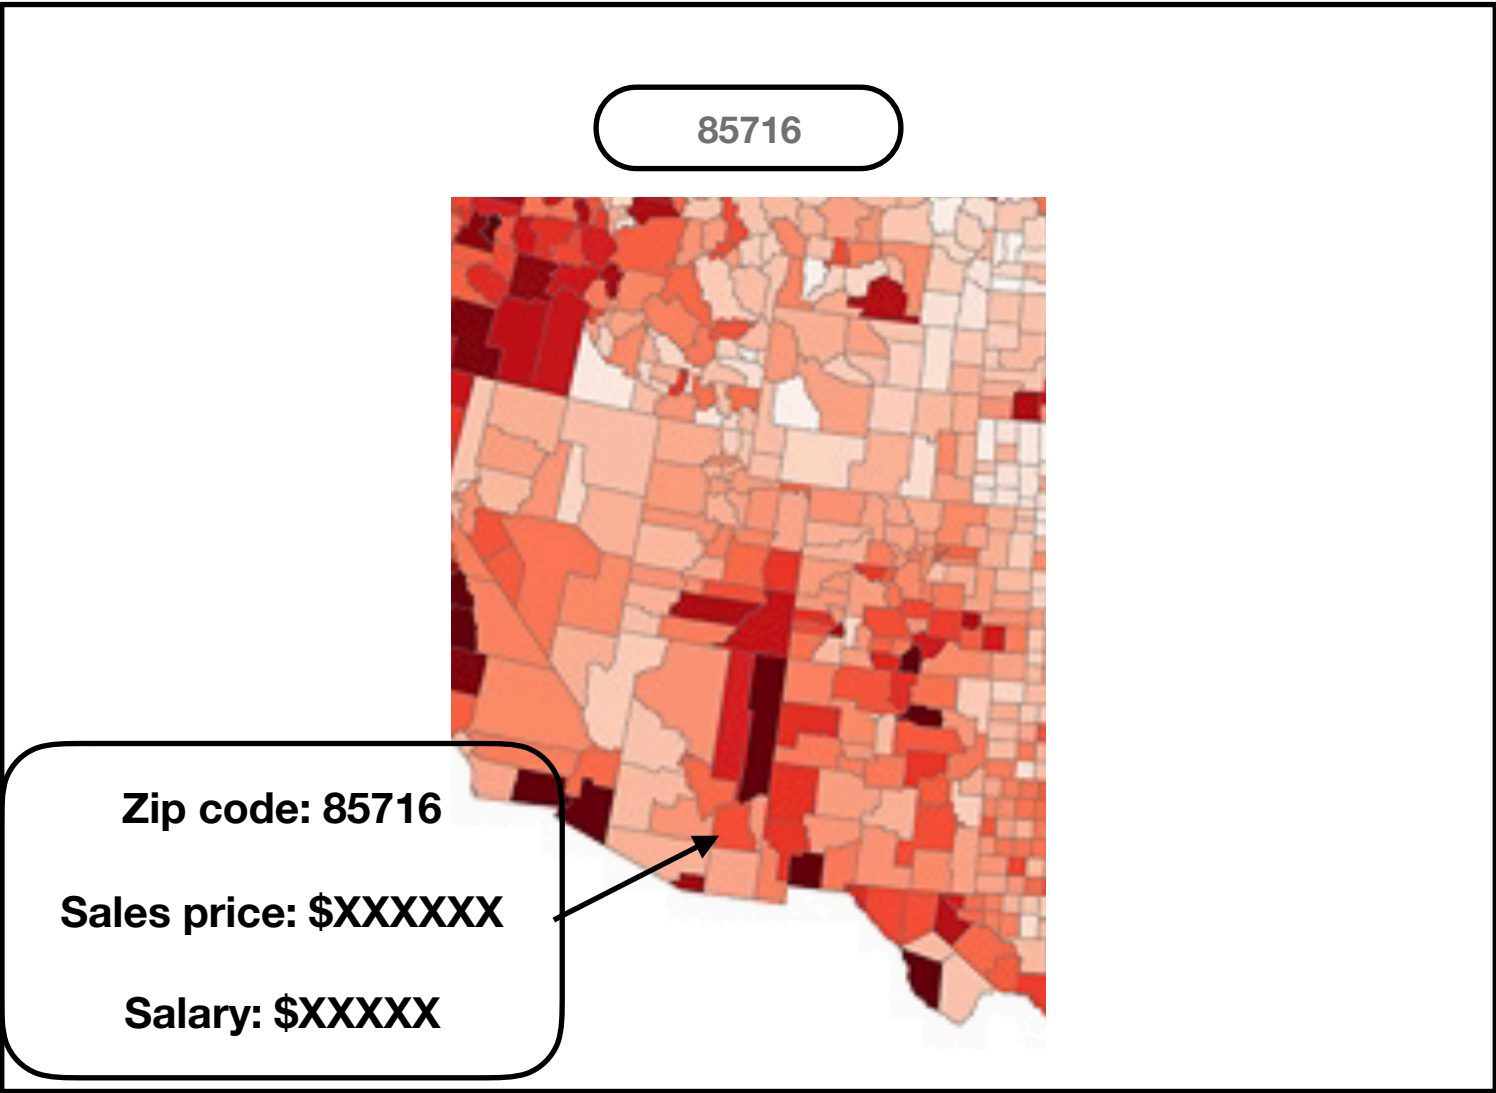

HousingAffordability.viz

[Main](#) [Salary](#) [About](#)

Notes:

Updated view after
a user inputs a zip
code.

Map auto zooms to
center the view on
the identified
zip code. Tooltip
also pops up to
display pertinent
info for that zip code.

HousingAffordability.viz

[Main](#) [Salary](#) [About](#)

About this project:

**Details about the models used to calculate affordability metric
and data sources for house prices, median salary, etc.**

HousingAffordability.viz

[Main](#) [Salary](#) [About](#)

Stretch Feature:
Adding the ability to see where a current salary would provide affordable housing prices.
The map view would update with colored areas indicating house prices affordable for the input salary.
